Hongkong, December 17rm, 1892.

Ar the meeting of the Legislative Council on Wednesday the Acting Attorney-General made an extraordinary proposal respecting the Hongkong College of Medicine for Chinese. What it amounted to in effect was that the graduates of that institution should be kicked out of the Colony bag and baggage. The Government, so the learned gentleman said, had decided that those young men could not possibly be allowed to earn their living here. Any native quack who has never read a medical work in his life is to be at liberty to practise amongst the Chinese, but the students of the College of Medicine, who have undergone several years' careful and liberal training under European doctors, are to be prescribed. A more glaring instance of Governmental stupidity it would be hard to imagine. It was only the other day that the Governor presided at the presentation of the diplomas to the successful students of the College of Medicine and apoke about a Government endowment for the institution, and now we have the Acting Attorney-General making the extraordinary proposition referred to is no longer opposed to the emigration of its above. This is a sheer misapprehension which will be easily dispelled

In face month becoming more and more pronounced easily victimised by brokers who have not followed the course of the Company, it may be useful to point out that the "knowing ones" are in the market to pick up Punjom shares, and bence it is strictly necessary to be on the slert, as private information is credited with very satisfactory accounts of the near future of the PRO BONO PUBLICO.
